JL re spectre HW 2/14/79

I'm not taking time to reread the enclosures. They are FBIHQ records via Koch. I wrote when I received them but after making up those of which I would want copies for when Lil could make them had the other matters of which you know that took precedence. Mainly what I'm doing now is making a list of them for when I can go over them later.

Probably the best way to identify them with little time is by Koch's numbers. They are anything but accurate what I'd prefer but I'll give proper identification later. This will let me know what you have in the event I come accross others.

If we need better copies I'll be able to get them from my master file. These are fairly remote generation copies. Some went from AG's copies to Lifton, maybe not directly, and he gave Paul copies.

The pap relippings is merely because those records adjoined when I saw them

557,
668 and 673
675,676,678,679,675
and 940,941

There is also what I believe is a duplicate of the NY 70 report on my Alan Burke appearance of 1966, WBAI-TV. This appears to be the FBIHQ original. I am not sure but I thought the other copy was from NY 70 under PA

Amusing and not sounding. They caption media cooperation, which kicked back but I knew someone had prepared those lawyers. Note none of this in report.

The contortions over my 5/23/66 spectre letter are great. First they work out their own formulation of what I did not say in order to make an impressive case for themselves and nobody ever dares disagree. Emperor and clothes.

I could not have hit them better for that period, it is clear.

Note that FBIHQ manages to find this subversive and place a copy in a 100 file. Maybe the one on me. Number seems familiar.

What I can I'll be going over these and the other copies. With another t trip next week and that one taking three days maybe not as soon as I expected.
